Tuna is Māori for eel

Cool facts about tuna

- ◆ Longfin tuna is in danger, just like the little spotted kiwi.
- ◆ Tuna have survived the ice ages.
- ◆ Tuna are a taonga (treasured) species to Māori.
- ◆ Tuna leave Aotearoa at the age of a human granny to swim 4000 km to have babies.

Action we can do

Do you know all the water from our driveways, footpaths and roads goes into gutters and drains. Then it flows through underground pipes, that go straight, into our streams and rivers where our tuna live.

Please do....

- ⇒ Wash cars at a car wash or on the grass so bubbles and dirt don't go down the drain
 - ⇒ Keep our gutters and drains clean
 - ⇒ Pick up litter
 - ⇒ Pick up your dog's poo
-Or the tuna will get sick.

Thank you / Ngā mihi
